

A systems thinking and function finding activity.

Tail thermoregulates to keep the squirrel “toasty warm”
Telephone wires used as an adaptation to cities
Eats nuts and berries, is eaten by wolves

Summary: Learners will be exposed to three artistic approaches to expressing the world they experience and will create elaborate pieces of their own art using icon pictures, hidden pictures and images within images, representing what they discover about various local native animals, systems and habitats, and the field of biomimicry (nature-inspired-innovation), as components of permanent signs to benefit other learners visiting a natural site.
